

## Manhattan Plaza HD-S2 - How to update software to version 1.26

### IMPORTANT

Please note that due to the changes in this release, the receiver will automatically reset to factory default and all user settings such as below will be lost!

- Favourites
- Reminders
- Deleted channels
- Settings

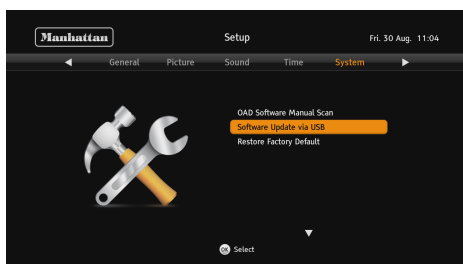

After reset, the installation process will start. Please follow the on-screen prompts and if you need assistance refer to the "Tuning In" section on page 12 of the User Guide.

### Updating the software

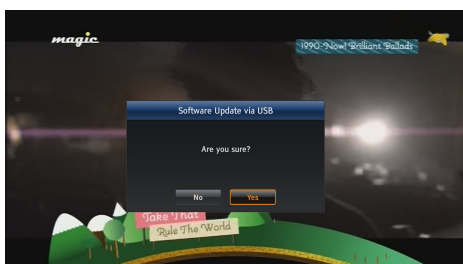

1. Unzip and extract the downloaded file onto your computer.
2. Copy **usb.bin** file to the root directory of a USB memory stick that is formatted with the FAT32 file system. This is the default when you format a USB stick using Windows.

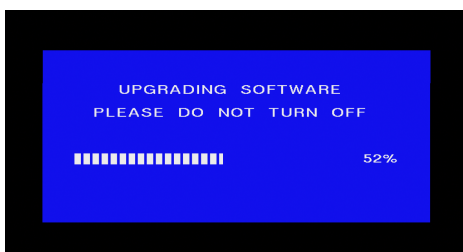

3. Connect the USB memory stick to the USB connector at the back of the receiver and wait until TV screen displays **USB Inserted** for a few seconds.

4. Press the **MENU** button to display the **Setup** options. Press the **Left** button once to highlight the **System** setup option. Press the **Down** button until the **Software Update via USB** option is highlighted, then press **OK** button.

5. **Software Update via USB** screen will be displayed. Press **OK** button when **Yes** option is highlighted. The software update will start after a few seconds followed by displaying the below updating screen.

### Information and update progress

#### UPGRADING SOFTWARE PLEASE DO NOT TURN OFF

Updating software please wait until finished. After update, the receiver will reboot and display the **Freesat Installation** screen. Disconnect the USB memory stick and install the receiver.

### Information Menu

You can check the updated Software Version in the **Information** menu. Press **MENU** button then highlight **Information** and press **OK**. Press **OK** or **EXIT** button after you have finished checking.
